

PAPER PLATE COW PROCEDURE

Features are the special parts of a plant or animal that make them unique and help them to survive.

What are some of
the features of a
cow?

Materials:

- Scissors
- Two goggly eyes
- A small paper plate
- Glue or a stapler
- A marker
- A pencil
- Black paper
- Pink paper

Step One:

Cut your paper plate in half.

Cut one half of your plate in half again so that now you have two quarters and a half.

Step Two:

Take one of the quarters of your paper plate and use your scissors to cut three strips.

Two of your strips should be the same width, the third one should be thinner.

Step Three:

Take the other quarter of your paper plate and use your pencil to draw a cow head with ears and horns.

Use your scissors to cut out your cow's head when you have finished drawing.

Step Four:

Use your glue or a stapler to attach your cow's head, legs and tail to your paper plate half.

Step five:

Take your black piece of paper and cut two small squares from the corner.

Use your glue to stick them to the bottom of your cow's legs as hooves.

Step Six:

Use your pencil to draw some cow spots on the rest of your black paper.

Use your scissors to cut them out.
Use your glue to stick them onto your cow.

Step Seven:

On your pink piece of paper use your pencil and a marker to draw a semi circle with two dots and a smile.

These dots look like eyes, but they are actually your cow's nose!

Step Eight:

Use your pencil to draw an udder next to your cow's nose.

On the same piece of paper, draw two ovals for your cow's ears.

Step Nine:

Use your scissors to cut out you cow's nose, ears and udder.

Use your glue to stick these features onto your cow.

Step Ten:

Use your glue to stick your two goggly eyes onto your cow's face, above the nose.
